

EU LIFE+ Information & Communication RESTORE Project

Rivers: Engaging, Supporting and Transferring knOwledge for Restoration in Europe

Engagement Event

Workshop theme:

Linking wetland, floodplain and river restoration

Venue and date:

The 7th Annual Meeting of the SWS European Chapter - 20th June 2012 in Aarhus, Denmark

Objectives:

- 1. Collect information on the perceived limitations and drivers for river and floodplain restoration across Europe.
- Identify how to make better links between restoring rivers, floodplains and wetlands.
 Currently, these restoration activities are often delivered independently, which can result in a conflict of interests.

Outputs:

These will be used to help develop RESTORE tools and guidance to provide information for a range of end users including river basin managers, policy makers and interested groups for future project delivery and research.

Workshop conveners:

Antonia Scarr, RESTORE Project Manager - <u>Antonia.scarr@environment-agency.gov.uk</u>

Jenny Mant, River Restoration Centre – <u>jenny@therrc.co.uk</u>

Agenda:

The three hour workshop will enable participants to suggest how we can work together more effectively and, through RESTORE ensure that synergy between rivers; wetland and floodplain restoration can be made.

The workshop will comprise a mixture of longer guided discussion periods interspersed with the following presentations:

- Introduction to RESTORE as a tool to communicate, educate and disseminate knowledge about river and floodplain restoration.
- Outline of the workshop: Exploring the concepts of river restoration in the context of wetland and floodplain restoration.
- A case study about linking rivers and floodplains: multiply benefits for wildlife, flood risk and recreation. Outputs and lessons learned.

Workshop Part One

13.20 - 14.50

Key questions to be developed:

- How can we have better joined up thinking about wetlands and river restoration?
- What are the main obstacles to achieving this?
- What can be done to help to achieve these linkages?
- Do you have good examples of where river and floodplain projects have had successful multiple benefit outcomes?

Discussion presentation:

Does current policy help us to achieve more joined up thinking in terms of river and floodplain restoration?

Workshop Part Two

15.20-16.20

Key questions to be developed:

- What are the high level policies in different countries?
- Do they help in our decision making processes and can we influence these?
- How can the RESTORE project help?

Final comments and feedback session:

Explanation about what you can expect as outputs from this session.
